

According to the Code of Federal Regulations, Subpart B, §206.35(d) and §206.37(d) the existence of an actual disaster must be determined before emergency powers may be claimed by State acting officials. According to the Federal Rule of Evidence 602, witnesses must have first-hand knowledge of a matter for their testimony to be admissible evidence. Federal Rule of Evidence 803 requires any learned treatise (Such as reports by the WHO and the CDC) to be examined in court with an expert witness under oath on cross-examination to be admitted as admissible evidence, otherwise the report or treatise is considered hearsay and inadmissible. What we will find is that the Federal and State Government acting officials have provided no admissible evidence of any Covid-19 Pandemic whatsoever making their claims to Emergency Powers baseless, fraudulent and tyrannical. All modern Governor Covid-19 Disaster Proclamations contain baseless claims of transmission of Covid-19.

1. American acting Governors have failed to provide proof of an isolated Coronavirus. On the contrary I have provided citations from reputable learned treatises that admit no Coronavirus Isolation:

- “Since no quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed and this study conducted...”[i]
- “**virus isolates are unavailable**...We aimed to develop and deploy robust diagnostic methodology for use in public health laboratory settings **without having virus material available**... In the present case of 2019-nCoV, **virus isolates** or samples from infected patients have so far **not become available to the international public health community**”[ii]
- Wu Zunyou of the Chinese Center For Disease Control, “They didn’t isolate the virus. That’s the issue.”[iii]

As for the PCR Tests, Torsten Engelbrecht and Konstantin Demeter, authors of the article, *COVID19 PCR Tests are Scientifically Meaningless*, showed that PCR detection of particles of RNA and DNA do not explain how those particles got there in the first place and do not prove an invasive organism. They contacted the authors of several SARS-CoV-2 papers discussing electron-microscopic images of the virus

and they all admitted that their images are not of a purified virus.

2. They have failed to provide proof that this alleged virus is the proximate cause[iv] of any harm, injury or loss, to any man. The CDC admits that the cause of Death in this alleged Pandemic are assumptions not firsthand knowledge: “Coronavirus Disease 2019 or COVID-19 should be reported on the death certificate for all decedents where the disease caused **or is assumed to have caused**...”[v] The CDC even admitted that 94% of alleged Covid-19 deaths had comorbidities.[vi] Doctors get paid more for diagnosing their patients with Covid-19.[vii]

- “Detection of viral RNA may not indicate the presence of infectious virus or that 2019-nCoV is the causative agent for clinical symptoms...This test cannot rule out diseases caused by other bacterial or viral pathogens.”[viii]
- “No CPE[Cytopathic effect] was observed in any of the cell lines except in Vero cells, which grew to >10<sup>7</sup> PFU at 24 h postinfection. In contrast, HUH7.0 and 293T cells showed only modest viral replication, and A549 cells were incompatible with SARS-CoV-2 infection.”[ix]

3. They have failed to provide first-hand knowledge of transmission of this alleged Coronavirus. Transmission is a speculative theory and it is admitted by modern authorities that viruses are part of the human microbiome[x] and not a product of invasion. In the CDC publication, *Scientific Brief: SARS-CoV-2 Transmission* – May 7, 2021, in the section, “Transmission of SARS-CoV-2 from inhalation of virus in the air farther than six feet from an infectious source can occur” 12 studies are cited in support of transmission. None of these studies document first-hand knowledge of transmission; they only mention beliefs, conjectures, speculations and hypotheses:

- *Report of the WHO-China Joint Mission on Coronavirus Disease 2019* (COVID-19) 16-24 February 2020, “it is not **believed** to be a major driver of transmission...however, it can be **envisaged**(pg. 8)...Early cases identified in Wuhan are **believed** to be have acquired infection from a zoonotic source.”(pg. 10)

- *Indirect Virus Transmission in Cluster of COVID-19 Cases, Wenzhou, China, 2020*, Volume 26, Number 6—June 2020, by the CDC and its agents, “To determine **possible** modes of virus transmission...To determine how the virus **may have spread** among a cluster of COVID-19 cases associated with a shopping mall in Wenzhou (a city with 8 million residents), China, we monitored and traced close contacts and **hypothesized possible transmission modes**.”

- Brlek A, Vidovic S, Vuzem S, Turk K, Simonovic Z. “**Possible** indirect transmission of COVID-19 at a squash court, Slovenia”, March 2020: case report. *Epidemiol Infect.* Jun 19 2020;148:e120. doi:10.1017/S0950268820001326
- Li Y, Qian H, Hang J, et al. “**Probable** airborne transmission of SARS-CoV-2 in a poorly ventilated restaurant”. *Build Environ.* Jun 2021;196:107788. doi:10.1016/j.buildenv.2021.107788

4. It is admitted by the Medical Community that viruses are part of the natural flora and therefore not a product of transmission.[xi] Coronavirus cannot be distinguished from Exosomes which are part of the microbiome as detoxifiers not invasive organisms:

- “EVs can be broadly divided into two categories, ectosomes and exosomes. Ectosomes are vesicles that pinch off the surface of the plasma membrane via **outward budding** [Just like the Covid-19 pictures we are shown - DS], and include microvesicles, microparticles, and large vesicles in the size range of ~50 nm to 1 µm in diameter [Just like Covid-19 - DS].”[xii]
- “One speculated role is that exosomes likely remove excess and/or unnecessary constituents from cells to maintain cellular homeostasis.”[xiii]
- “Exosomes act much like a sponge, preventing the toxins for a time from attacking the cell, while toxins that are not corralled are left to burrow through cell membranes,” says study co-senior investigator Ken Cadwell, PhD.”[xiv]
- “Hildreth now proposes that ‘the virus is fully an exosome in every sense of the word.’ ” [xv]
- “Exosomes, with an average diameter of ~100 nanometers, are a subset of EVs.”[xvi]
- “Especially in the case of retroviruses, EVs generated in infected cells contain selected molecules of viral origin and can be so similar to

noninfectious defective viruses that have lost their ability to replicate that the difference between them becomes blurred.”[xvii]

5. The Initial test kits sent by the CDC were themselves contaminated with the alleged virus.[xviii]

The purpose of this Hoax Pandemic is the fulfillment of the Depopulation agenda of the United Nations. You can read about this agenda in the United Nations’ publication *Global Biodiversity Assessment* page 773 where they explain their agenda of dropping the world population to 1 billion people. Dr. Charles Creighton pointed out how jaundice was what he called a “post-vaccinal effect” of the 19th century smallpox vaccine. (*Encyclopædia Britannica* 9th ed. Volume 24, pg. 31) The Globalists have been utilizing these stealthy post-vaccinal effects in a most lethal fashion through the decades: In the 1970s the Congo was being vaccinated for smallpox. Guess where the African AIDS epidemic came from in the same decade? The Congo. The Hepatitis B vaccine campaign of the 70s gave rise to the AIDS epidemic of the late 70s and 80s in America. Remember Creighton’s 19th century warning of “postvaccinal effects”!?
