1. The Zapruder Video is clearly spliced. Frames 208 – 211 are missing. As they pass the sign JFK is replaced with a dummy:

2. Another splice is seen with a male spectator whose legs close through frames 131-133.

3. JFK unnaturally raises his elbows to grab his neck like he is a puppet at frame 232.

4. From Frames 253 to 289 JFK's wife does not look to be horrified by her husband being shot in the neck but looks confused and turns away from him to the passenger in the front seat as if to say, "something isn't going as planned."

5. When JFK is shot in the neck there is no blood. (Frame 264)

6. When JFK is shot in the head in the Zapruder film the top half of his face is blown off and is seen hanging off his skull in Classic B Horror gore, but in the official autopsy photos his face is fine:

7. The driver turns around with a gun in his left hand and shoots JFK in the head yet he looks CGI. This is clear misdirection to make it look real to conspiracy guys like William Cooper who said this was the real shooter, assuming of course the event was real.
